

Elimination of the laws which limit the number of stations a company can own is a BAD, BAD, BAD, BAD IDEA!!!! We do not want a small number of companies to own all the stations. Are you out of your friggin' minds??? We just won't listen to these stations that all sound alike and there goes your advertising \$\$\$\$\$. I will make every effort to publicize this outrage to my friends and encourage them to support public radio stations. Survival of the fittest....corporate owned radio stations will die because no one wants to listen to that garbage and public-supported stations will live.
